

src.thermo.energy\_derivatives

```
graph LR; A[src.thermo.energy_derivatives] --> B[src.finite_difference.f12d3p]; A --> C[src.finite_difference.fdwrap];
```

The diagram illustrates a branching relationship from a single source to two targets. The source node, 'src.thermo.energy\_derivatives', is a gray rectangle on the left. Two blue arrows originate from its right side, pointing to two white rectangular target nodes on the right. The top target node is 'src.finite\_difference.f12d3p' and the bottom target node is 'src.finite\_difference.fdwrap'.
