

FileHandler

```
classDiagram
    class FileHandler
    class RawFileHandler["src.output.RawFileHandler"]
    RawFileHandler --|> FileHandler
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'FileHandler'. Below it is a box labeled 'src.output.RawFileHandler'. A blue arrow points from the 'src.output.RawFileHandler' box up to the 'FileHandler' box, indicating that 'src.output.RawFileHandler' inherits from 'FileHandler'.

src.output.RawFileHandler
