

src.amberio.is\_mol2\_atom

```
graph LR; A[src.amberio.is_mol2_atom] --> B[src.molecule.isint]; A --> C[src.molecule.isfloat];
```

A diagram showing a source node on the left, labeled 'src.amberio.is\_mol2\_atom', which is shaded gray. Two blue arrows point from this source node to two target nodes on the right. The top target node is labeled 'src.molecule.isint' and the bottom target node is labeled 'src.molecule.isfloat'. Both target nodes are white with black borders.

src.molecule.isint

src.molecule.isfloat
