

src.thermo.energy_derivatives

```
graph LR; A[src.thermo.energy_derivatives] --> B[src.finite_difference.f12d3p]; A --> C[src.finite_difference.fdwrap];
```

The diagram illustrates a branching relationship. A single source node on the left, labeled 'src.thermo.energy_derivatives', has two outgoing arrows pointing to two separate target nodes on the right. The top target node is labeled 'src.finite_difference.f12d3p' and the bottom target node is labeled 'src.finite_difference.fdwrap'. The source node is shaded gray, while the target nodes are white with black borders.

src.finite_difference.f12d3p
